👤 SUMMARY

AI Automation Engineer specializing in building practical, business-ready automation systems using n8n, LLMs, API integrations, and multi-agent workflows. Experienced in transforming messy real-world processes into automated, scalable, and high-performance solutions. Skilled at generating marketing content pipelines, debugging agentic behavior, and integrating AI tools into existing business operations. Passionate about building efficient automation systems that save time, reduce operational load, and improve productivity.

📁 EXPERIENCE

2025 – Present
Port Harcourt, Nigeria

AI Automation Engineer
Multiskills Nigeria Limited

- Designed and built LLM-powered automation workflows using n8n.
- Created multi-agent systems including SDR agents, marketing content agents, and supervisor agents.
- Integrated APIs for lead generation, job search, content writing, and CRM communication.
- Developed system messages, SOPs, and agent rules to stabilize agent performance and prevent hallucination.
- Automated content generation pipelines for LinkedIn, email, and brand marketing.
- Collaborated on building complex multi-agent architectures under tight deadlines.
- Engineered marketing and SDR automation workflows using LLMs and HTTP integrations.

🎓 EDUCATION

2021 – 2026

Bachelor of Technology in Software Engineering
Federal University of Technology, Akure

🧠 CORE SKILLS

AI Automation & Workflow Engineering

- n8n workflow design & debugging
- Multi-agent system design
- LLM-based task automation
- Agent SOP creation
- Automation pipeline testing
- Webhooks & event-driven flows

Business Tools & Platforms

- **CRM & Sales:** Odoo, Custom CRM integrations
- **Communication:** Slack, Discord, Telegram, WhatsApp API, Email (Gmail, Outlook)
- **Productivity:** Google Workspace, Notion, Airtable
- **Marketing:** Social media APIs, Email marketing platforms, Content management

LLM Engineering & Prompting

- System message design
- Prompt engineering
- AI reasoning control
- Content automation prompts
- Agent training rules & guardrails

Programming & Development:

- **Languages:** Python (intermediate), JSON, SQL
- **Databases:** PostgreSQL, Supabase, Airtable

LANGUAGE

- English
- German

Tools

- n8n
- OpenAI / GPT models
- Google Workspace
- Notion

Projects

SDR Transcript Automation System

- Built an automated workflow that processes SDR call transcripts, extracts insights, and generates marketing content and email campaigns using LLMS.

Marketing Multi-Agent System

- Designed a supervisor + worker agent structure to generate, review, package, and deliver marketing content through n8n.

Content Automation Pipeline

- Automated long-form and short-form content creation for LinkedIn, blogs, and emails using structured prompts and reusable templates.

Conversational AI Voice Agent (Retell AI + n8n)

- Engineered multi-node conversational flow for car rental business customer service automation
- Designed logic split nodes for intent recognition and dynamic context switching
- Integrated backend APIs for real-time availability checking and booking creation
- Implemented intelligent call transfer for complex scenarios

AI-Powered Lead Qualification & Research Pipeline

- Built webhook-triggered automation system combining data enrichment, AI research, and CRM integration
- Integrated OpenAI API for intelligent lead scoring and automated company research
- Implemented conditional routing directing high-value leads to immediate sales action, low-priority to nurture sequences
- Connected to meeting scheduling systems, phone call creation, and database synchronization
